

Review for Confirmation on 9-14-16

Name

Read Genesis Chapter One

- 1) How long does a “day” represent? What do you base your answer on by reading this chapter?

- 2) If God created everything, then who created God? What does your answer say about the nature of God?

- 3) The great astronomer, Edward Hubble, discovered that the universe is expanding. If you work your way backward to the beginning, in what way does this look like what the Bible teaches?

- 4) Did dinosaurs exist with humans? (Check out the description of the behemoth in Job 40:15.)

- 5) Paleontologist, Mary Schweitzer, discovered a T-Rex with soft tissue inside the bone. This discovery suggest the age of the T-Rex was at most a couple thousand years old because otherwise the inside would have been fossilized. Since many ancient civilizations have been found to have pottery, cave and other drawings of dinosaurs, what does this say about the theory that dinosaurs existed and died out before humans came to exist?
